

# ClearMet Partial

## *The Future of Partial Denture*

ClearMet Partial is the most functional and superior partial denture on the market today. The ClearMet Partial frame contains the same functions as the metal framed partial with some additional functions that do not exist in any other partial on the market. ClearMet Partials are made of material that is monomer free, FDA approved, and with no known allergic reactions. Nonporous – Bacteria and stain resistant – no odors. Exceptional outcomes require a synergy among the patient, the doctor, and the ClearMet certified laboratory. Our goal is not only to improve smiles, but more importantly, improve lives. Not only will your patients be more confident in their appearance, but they will eat better, and that can have a very positive impact on their over-all health. Our goal is to provide you with a superior partial denture, crafted to your patients personal treatment needs, at an affordable fee. The only *Clear Choice* for partials.

# ClearMet Training Course

## *Becoming ClearMet Certified*

**In this One day hands-on course technicians will study design and fabrication techniques for the Clear-Met Partials. The course will cover design & block-out, waxing, processing, finishing and polishing techniques for Clear-Met partial dentures.**
